

Installation and Setup Guide

INSTALL OVER OLD INSTALL

COVERPLATE-001-V0

1. Remove old mounting plate
2. Fold out the gasket flaps
3. Fix mounting plate to ceiling or wall using screws provided with detector
4. Push gasket flaps back in
5. Place detector and twist onto base
6. Test alarm

CEILING/JUNCTION BOX

COVERPLATE-002-V0

1. Remove the ceiling/junction box screws
2. Affix a listed cover to the ceiling/junction box using the existing screws (leave the screws partially unscrewed)
3. Fold out the gasket flaps
4. Place mounting plate on ceiling/junction box ensuring the screws go through the designed keyslots
 - A. 3.5 in (89 mm) - Rotate plate
 - B. 2.75 in (70 mm) - Slide plate
5. Tighten screws
6. Push gasket flaps back in
7. Place detector and twist onto base
8. Test alarm

NEW INSTALL

COVERPLATE-003-V0

1. Fold out the gasket flaps
2. Fix mounting plate to ceiling or wall using screws provided with detector
3. Push gasket flaps back in
4. Place detector and twist onto base
5. Test alarm

COVERPLATE-004-V0

Detector should be mounted at least 12 in (305 mm) from obstructions, ideally in center of room/area

WARNING: Do NOT remove the gaskets as this will interfere with the performance of the detector.

Guide d'installation et de configuration

INSTALLER SUR L'ANCIENNE INSTALLATION

1. Retirez l'ancienne plaque de montage
2. Pliez les volets des joints
3. Fixez la plaque de montage au plafond ou au mur à l'aide des vis fournies avec le détecteur
4. Repoussez les volets des joints
5. Placez détecteur et pivotez-la sur la base
6. Testez l'alarme

BOÎTE DE JONCTION/ PLAFOND

1. Retirez les vis de la boîte de plafond/jonction
2. Fixez un couvercle indiqué sur la boîte de plafond/jonction à l'aide des vis existantes (laissez les vis partiellement dévissées)
3. Pliez les volets des joints
4. Placez la plaque de montage sur la boîte de plafond/jonction en vérifiant que les vis passent par les emplacements prévus
A. 89 mm (3,5 po) - Tournez la plaque
B. 70 mm (2,75 po) - Coulissez la plaque
5. Serrez les vis
6. Repoussez les volets des joints
7. Placez détecteur et pivotez-la sur la base
8. Testez l'alarme

NOUVELLE INSTALLATION

1. Pliez les volets des joints
2. Fixez la plaque de montage au plafond ou au mur à l'aide des vis fournies avec le détecteur
3. Repoussez les volets des joints
4. Placez détecteur et pivotez-la sur la base
5. Testez l'alarme

L' détecteur doit être montée au minimum à 305 mm (12 po) de toute obstruction, idéalement au centre de la pièce ou de la zone

AVERTISSEMENT : Ne retirez PAS les joints d'étanchéité, car cela nuira au bon fonctionnement de détecteur.

Guía de instalación y configuración

INSTALAR SOBRE LA INSTALACIÓN ANTIGUA

1. Retire la placa de montaje vieja
2. Despliegue las solapas de la junta
3. Fije la placa de montaje al techo o a la pared con los tornillos suministrados con el detector
4. Presione las solapas de la junta de nuevo hacia adentro
5. Coloque la detector y gire sobre la base
6. Pruebe la alarma

TECHO/CAJA DE CONEXIONES

1. Retire los tornillos del techo/caja de conexiones
2. Coloque una cubierta listada en el techo/caja de conexiones utilizando los tornillos existentes (deje los tornillos parcialmente desatornillados)
3. Despliegue las solapas de la junta
4. Coloque la placa de montaje en el techo/caja de conexiones asegurándose de que los tornillos pasen por las ranuras diseñadas para ello
 - A. 89 mm (3,5 in) - Placa de rotación
 - B. 70 mm (2,75 in) - Placa deslizante
5. Apriete los tornillos
6. Presione las solapas de la junta de nuevo hacia adentro
7. Coloque la detector y gire sobre la base
8. Prueba la alarma

NUEVA INSTALACIÓN

1. Despliegue las solapas de la junta
2. Fije la placa de montaje al techo o a la pared con los tornillos suministrados con el detector
3. Presione las solapas de la junta de nuevo hacia adentro
4. Coloque la detector y gire sobre la base
5. Pruebe la alarma

La detector debe montarse a una distancia mínima de 305 mm (12 in) de los obstáculos, idealmente en el centro de la sala/área

ADVERTENCIA: NO retire las juntas, ya que esto interferirá con el rendimiento de la detector.

Guia de instalação e configuração

INSTALE SOBRE INSTALAÇÃO ANTIGA

1. Remova a placa de montagem antiga
2. Dobre as abas da junta
3. Fixe a placa de montagem no forro ou na parede usando os parafusos fornecidos com o detector
4. Empurre as abas da junta para dentro
5. Coloque o detector e o gire na base
6. Teste o alarme

FORRO/CAIXA DE PASSAGEM

1. Remova os parafusos do forro/caixa de passagem
2. Fixe uma tampa listada no forro/caixa de passagem junção usando os parafusos existentes (deixe os parafusos parcialmente desparafusados)
3. Dobre as abas da junta
4. Coloque a placa de montagem no forro/caixa de passagem garantindo que os parafusos passem pelos furos projetados
A. 3,5 pol. (89 mm) - Gire a placa
B. 2,75 pol. (70 mm) - Deslize a placa
5. Aperte os parafusos
6. Empurre as abas da junta para dentro
7. Coloque o detector e o gire na base
8. Teste o alarme

NOVA INSTALAÇÃO

1. Dobre as abas da junta
2. Fixe a placa de montagem no forro ou na parede usando os parafusos fornecidos com o detector
3. Empurre as abas da junta para dentro
4. Coloque o detector e o gire na base
5. Teste o alarme

O detector deve ser montado a pelo menos 12 pol. (305 mm) de obstruções, idealmente em posição central da sala/área

ATENÇÃO: NÃO remova as juntas, pois isso interferirá no desempenho do detector.
