Installing the IR Illuminator Ring (Optional) 3

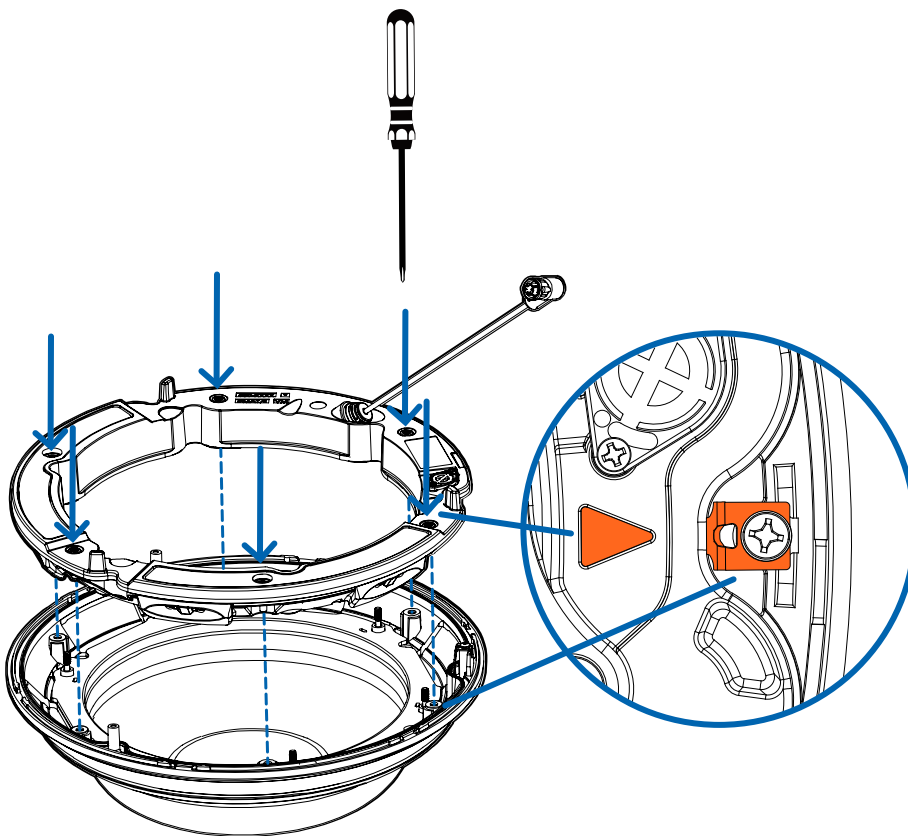

Installing the IR Illuminator Ring (Optional)

NOTE

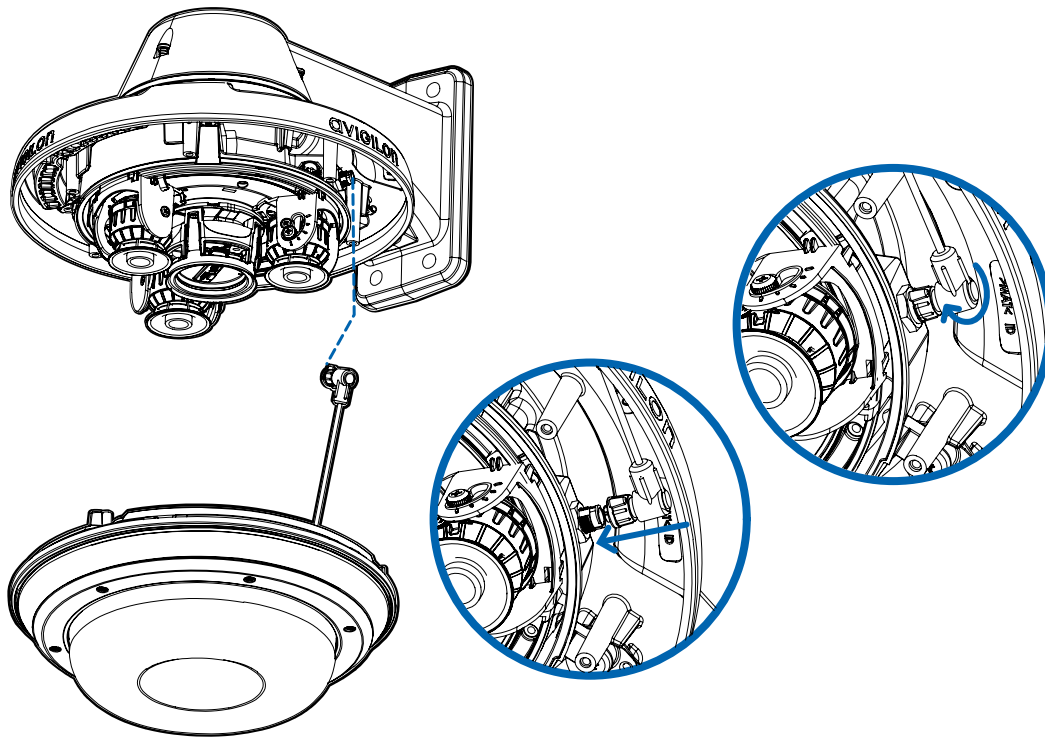

The optional IR illuminator ring (H4AMH-AD-IRIL1) is compatible with the pendant and surface mount installations of the H4 Multisensor camera. The hot-pluggable IR illuminator ring must be mounted in an outdoor dome cover (H4AMH-DO-COVR1 or H4AMH-DO-COVR1-SMOKE).

After the camera has been mounted into the mounting adapter, install the IR illuminator ring with the H4 Multisensor camera base:

1. Mount the IR illuminator ring into the dome cover (H4AMH-DO-COVR1 or H4AMH-DO-COVR1-SMOKE):
 - a. Insert the IR ring into the dome cover so that the orange arrow on the IR ring aligns with the orange tab on the dome cover.

- b. Use a screwdriver to secure the IR ring to the dome cover by tightening the 6 setscrews.
2. (Recommended) Attach a safety lanyard from the mounted camera to the lanyard anchor on the dome cover to prevent the cover from falling. See [Installing the Pendant Mount Dome Cover](#).
3. Push the IR ring cable onto IR connector on the camera base and turn the connector clockwise to secure the connection.
