

JPW-BA

Long Distance/ CCTV Camera Adaptor

The JPW-BA is a long distance and CCTV camera adaptor for the JP Series. As a long distance adaptor, it extends the wiring distance to the video door station up to 980'. The adaptor also provides integration for an analog CCTV camera to be connected in conjunction with the GT-D audio door station.

The JPW-BA will surface mount using the mounting holes or with the included W-DIN11 mounting rail. It is powered with a PS-2420UL. Each JPW-BA is used for one feature only. For multiple cameras or if both features are required, add the appropriate number of adaptors.

- **Extends wiring distance from door stations to answering stations up to 980'**

- **TAA compliant**

- **Allows for analog camera integration**

Power Source 24V DC (use PS-2420UL)
