

VISTA® H3 Hybrid Series 2-line Alpha Hardwired Landscape Keypad

VISTAHLKP/ VISTAHLKPFR

The VISTAHLKP hardwired landscape keypad with its illuminated 1-line alpha custom display, allows zone descriptions to be customized and gives end users the extra information needed during an emergency. The wider landscape-style design has a larger display making it easier to read, while the multiple function keys and audible beeps make it easier to utilize and understand system events and alarms. In addition, the dedicated emergency keys facilitate quick and easy calling during emergency situations.

The VISTAHLKP keypad displays four different languages, enabling keypad usage in regions that speak English, Spanish, French and Portuguese. The landscape style is similar to the 6160 and comes with a backplate to cover the wall footprint when updating 6160 VISTA installations. The 2X16 display has the same interface as the VISTAHPKP and PROSIXLCDKP, making it easier to mix keypads depending on user preferences and economics while keeping end user training costs minimal.

Through our private label program, you can customize product with your company contact information. The interchangeable, snap-on accent piece simplifies the private label process, so you can focus on supporting customers while improving retention and recurring business.

VISTAHLKP Keypad
